

## Austrian Parliament building Vienna renovation project – Project monitoring

**Client:**

Parlamentsdirektion Wien

**Country:**

Austria

**Duration:**

From March 2013 to 2024

**Services:**

Project monitoring

**Project objectives**

The parliament building is to undergo extensive renovation. The work is to be carried out in compliance with the general concept prepared in 2010 that specifies the renovation measures required for the rectification of damage and structural problems and also sets out measures designed to improve the use of the building.

**Project description**

Renovation of the historic parliament building: all parliamentary business will be conducted at an alternative location for the duration of the work.

**Project data**

GFA (gross floor area) approx. 80,000 m<sup>2</sup>, NFA (net floor area) approx. 51,000 m<sup>2</sup>

**Project specifics**

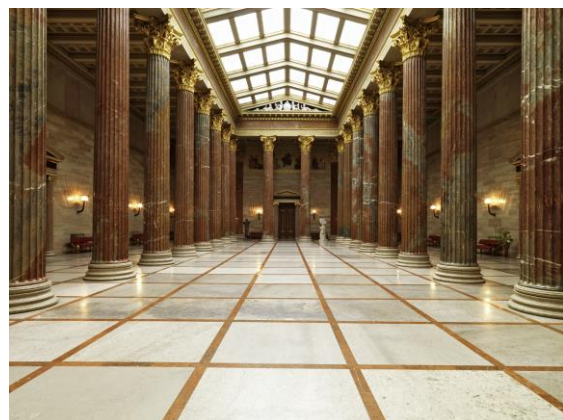

The building is listed as a structure of particular architectural and historic interest.

**Services**

Project monitoring
