

New Building for BGKK in Eisenstadt – Project Monitoring

Client:

Burgenländische Gebietskrankenkasse

Country:

Austria

Duration:

From 01.06.2014 to 31.08.2016

Services:

Project monitoring, project control

Project objectives

Project monitoring and consultancy services to support the client in technical and economic issues in the design and implementation (project control) of the new building for the headquarters of Burgenländische Gebietskrankenkasse (public health insurance provider) in Eisenstadt.

Project description

The current headquarters of Burgenländische Gebietskrankenkasse have been located on Esterhazyplatz since 1932. Due to changing legal conditions, technical necessities and the requirements to provide facilities that are accessible for disabled persons a new administration building is to be erected in Siegfried-Marcus-Strasse. This new building shall house all the necessary organisational, technical and administrative units as well as examination rooms and treatment facilities.

Project data
